CPG 6 15.115 Use of Medicated Feeds for Minor Species

11/21/99
6349 '99 DEC -1 P2 :03

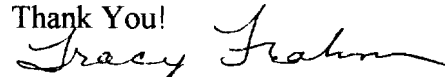

Hello!

I am writing to you to encourage you to support the proposed Compliance Policy Guide entitled "Use of Medicated Feeds for Minor Species".

I am a pheasant and quail producer. Currently, there are very few approved feed medications that I can use to treat my birds. Several, however, are approved for use in chickens and turkeys. My understanding is that the drug companies are not as interested in spending research money on tests to get drugs approved for gamebirds, because there are not as many gamebirds being produced as another more profitable specie. Currently, our national organization, **NAGA**, is working to get some drugs approved thru testing, but it will take time. In the interim, the proposal to allow **gamebird** producers to use feed medications approved for the major species is very important.

If this CPG compliance policy is put into force until the testing is completed with NRSP-7, it will in return, help many of those in my industry.

Thank You!

Tracy Frahm
